CONTENTS OF VOLUME 42

Number 1

B. BUDIANSKY and Y. L. CUI	1	On the tensile strength of a fiber-reinforced ceramic composite containing a crack-like flaw
F. X. GARAIZAR and D. G. SCHAEFFER	21	Numerical computations for shear bands in an antiplane shear model
N. TRIANTAFYLLIDIS and Y. M. LEROY	51	Stability of a frictional material layer resting on a viscous half-space
S. BARDENHAGEN and N. TRIANTAFYLLIDIS	111	Derivation of higher order gradient continuum theories in 2,3-D non-linear elasticity from periodic lattice models

Number 2

H. A. LUO and R. BALLARINI	141	The effects of anisotropy on the nonlinear behavior of bridged cracks in long strips
S. M. SHARMA, A. K. SRIVASTAVA and N. ARAVAS	159	Higher order crack tip asymptotic solutions for quasi-static steady crack growth in nonlinear viscous solids
M. T. A. SAIF and C.-Y. HUI	181	Plane strain asymptotic fields of a crack growing along an elastic–elastic power-law creeping bi-material interface
Z. YONG and M. T. HANSON	215	Three-dimensional crack and contact problems with a general geometric configuration
M. LUSK	241	On martensitic phase nucleation with surface effects
A. M. CHAPMAN and J. J. L. HIGDON	283	Effective elastic properties for a periodic bi-continuous porous medium
B. STORÅKERS and P.-L. LARSSON	307	On Brinell and Boussinesq indentation of creeping solids
J. R. RICE and G. E. BELTZ	333	The activation energy for dislocation nucleation at a crack

K. S. HAVNER, S.-C. WU and S. FUH 361 On symmetric bicrystals at the yield point in (110) channel die compression

Preliminary Announcement 381

Number 3

S. BROWN and G. ABOU-CHEDID 383 Yield behavior of metal powder assemblages

A. A. RUBINSTEIN 401 Strength of fiber reinforced ceramics on the basis of a micromechanical analysis

M. ZHOU, A. NEEDLEMAN and R. J. CLIFTON 423 Finite element simulations of shear localization in plate impact

S. R. KALIDINDI and L. ANAND 459 Macroscopic shape change and evolution of crystallographic texture in pre-textured fcc metals

Y. HUANG, K. X. HU, X. WEI and A. CHANDRA 491 A generalized self-consistent mechanics method for composite materials with multiphase inclusions

D. H. ALLEN, R. H. JONES and J. G. BOYD 505 Micromechanical analysis of a continuous fiber metal matrix composite including the effects of matrix viscoplasticity and evolving damage

M. ORTIZ and G. GIOIA 531 The morphology and folding patterns of buckling-driven thin-film blisters

Number 4

C. MAUGE and M. KACHANOV 561 Effective elastic properties of an anisotropic material with arbitrarily oriented interacting cracks

V. P. SMYSHLYAEV and J. R. WILLIS 585 Linear and nonlinear scattering of elastic waves by microcracks

J. TIROSH and D. IDDAN 611 The dynamics of fast metal forming processes

Y. J. CHAO, S. YANG and M. A. SUTTON 629 On the fracture of solids characterized by one or two parameters: theory and practice

W. YANG and Z. SUO 649 Cracking in ceramic actuators caused by electrostriction

G. P. CHEREPANOV 665 Interface microcrack nucleation

R. M. CHRISTENSEN 681 Properties of carbon fibers

W. E. OLMSTEAD, S. NEMAT-NASSER and L. NI 697 Shear bands as surfaces of discontinuity

Number 5

R. C. MCPHEDRAN and A. B. MOVCHAN 711 The Rayleigh multipole method for linear elasticity

S. VIGDERGAUZ 729 Three-dimensional grained composites of extreme thermal properties

H. GAO 741 Some general properties of stress-driven surface evolution in a heteroepitaxial thin film structure

R. BECKER and R. E. SMELSER 773 Simulation of strain localization and fracture between holes in an aluminum sheet

T. J. BURNS 797 A simple criterion for the onset of discontinuous plastic deformation in metals at very low temperatures

J. R. RICE, Y. BEN-ZION and K.-S. KIM 813 Three-dimensional perturbation solution for a dynamic planar crack moving unsteadily in a model elastic solid

T. W. SHIELD and K.-S. KIM 845 Experimental measurement of the near tip strain field in an iron–silicon single crystal

Announcements 875

Number 6

K. J. HSIA, Z. SUO and W. YANG 877 Cleavage due to dislocation confinement in layered materials

W. YANG, W. WANG and Z. SUO 897 Cavity and dislocation instability due to electric current

H. ZHANG and W. YANG	913	Three-dimensional dislocation loops generated from a weak inclusion in a strained material heterostructure
V. A. LUBARDA	931	Elastoplastic constitutive analysis with the yield surface in strain space
A. K. GHOSAL and R. NARASIMHAN	953	A finite element analysis of mixed-mode fracture initiation by ductile failure mechanisms
S. SURESH, A. E. GIANNAKOPOULOS and M. OLSSON	979	Elastoplastic analysis of thermal cycling: layered materials with sharp interfaces
P. W. GREGORY, T. G. ROGERS and A. H. ENGLAND	1019	Loading and unloading of highly anisotropic elastic–plastic beams
G. PERRIN and J. R. RICE	1047	Disordering of a dynamic planar crack front in a model elastic medium of randomly variable toughness
Corrigendum	1065	

Number 7

A. R. AKISANYA, A. C. F. COCKS and N. A. FLECK	1067	Hydrostatic compaction of cylindrical particles
A. J. LEVY	1087	Separation at a circular interface under biaxial load
H. A. SOSA and M. A. CASTRO	1105	On concentrated loads at the boundary of a piezo-electric half-plane
J. HELSING	1123	Bounds on the shear modulus of composites by interface integral methods
Z. C. XIA, J. W. HUTCHINSON, A. G. EVANS and B. BUDIANSKY	1139	On large scale sliding in fiber-reinforced composites
G. ALPA and I. MONETTO	1159	Microstructural model for dry block masonry walls with in-plane loading

Number 8

N. PHAN-THIEN and S. KIM	1177	On the elastic double layer: some exact solutions and the spectrum on the sphere
T. J. GOSLING and J. R. WILLIS	1199	A line-integral representation for the stresses due to an arbitrary dislocation in an isotropic half-space
J. J. VLASSAK and W. D. NIX	1223	Measuring the elastic properties of anisotropic materials by means of indentation experiments
D. MARTÍNEZ and V. GUPTA	1247	Energy criterion for crack deflection at an interface between two orthotropic media
Y. HUANG, K. X. HU and A. CHANDRA	1273	A generalized self-consistent mechanics method for microcracked solids
G. MEDA and P. S. STEIF	1293	A detailed analysis of cracks bridged by fibers—I. Limiting cases of short and long cracks
G. MEDA and P. S. STEIF	1323	A detailed analysis of cracks bridged by fibers—II. Cracks of intermediate size
Announcement	1343	

Number 9

N. HALLBÄCK and F. NILSSON	1345	Mixed-mode I/II fracture behaviour of an aluminium alloy
A. F. BOWER and N. A. FLECK	1375	Brittle fracture under a sliding line contact
X.-P. XU and A. NEEDLEMAN	1397	Numerical simulations of fast crack growth in brittle solids
YU. I. MESCHERYAKOV, N. A. MAHUTOV and S. A. ATROSHENKO	1435	Micromechanisms of dynamic fracture of ductile high-strength steel
P. PONTE CASTAÑEDA and M. ZAIDMAN	1459	Constitutive models for porous materials with evolving microstructure

Number 10

S. D. PAPKA and S. KYRIAKIDES	1499	In-plane compressive response and crushing of honeycomb
E. A. DE SOUZA NETO, D. PERIĆ and D. R. J. OWEN	1533	A phenomenological three-dimensional rate-independent continuum damage model for highly filled polymers: formulation and computational aspects
W. H. YANG and D. J. SROLOVITZ	1551	Surface morphology evolution in stressed solids: surface diffusion controlled crack initiation
D. ZHANG and S. C. COWIN	1575	Oscillatory bending of a poroelastic beam
H. ZHU and Y. WEITSMAN	1601	The progression of failure mechanisms in unidirectionally reinforced ceramic composites
J.-Q. TARN	1633	An asymptotic theory for dynamic response of anisotropic inhomogeneous and laminated cylindrical shells
	1651	Announcement

Number 11

B. SUN, Z. SUO and A. G. EVANS	1653	Emergence of cracks by mass transport in elastic crystals stressed at high temperatures
J. J. MASON, A. J. ROSAKIS and G. RAVICHANDRAN	1679	Full field measurements of the dynamic deformation field around a growing adiabatic shear band at the tip of a dynamically loaded crack or notch
A. BHATTACHARYYA and G. J. WENG	1699	An energy criterion for the stress-induced martensitic transformation in a ductile system
P. LU and O. MAHRENHOLTZ	1725	Extension of the Stroh formalism to the analysis of bending of anisotropic elastic plates
W. S. SLAUGHTER and N. A. FLECK	1743	Microbuckling of fiber composites with random initial fiber waviness
P. BALLARD and A. CONSTANTINESCU	1767	On the inversion of subsurface residual stresses from surface stress measurements

H. YU and W. YANG 1789 Mechanics of transonic debonding of a bimaterial interface: the anti-plane shear case

R. HILL 1803 Classical plasticity: a retrospective view and a new proposal

A. G. VARIAS and C. F. SHIH 1817 Dynamic steady crack growth in elastic–plastic solids—propagation of strong discontinuities

1849 Announcement

Number 12

V. P. SMYSHLYAEV and N. A. FLECK 1851 Bounds and estimates for linear composites with strain gradient effects

M. LI and D. C. DRUCKER 1883 Instability and bifurcation of a nonassociated extended Mises model in the hardening regime

Y. SUN and G. E. BELTZ 1905 Dislocation nucleation from a crack tip: a formulation based on anisotropic elasticity

A. TROCHIDIS and B. POLYZOS 1933 Dislocation annihilation and acoustic emission during plastic deformation of crystals

R.-B. YANG and A. K. MAL 1945 Multiple scattering of elastic waves in a fiber-reinforced composite

P. STEINMANN, C. MIEHE and E. STEIN 1969 On the localization analysis of orthotropic Hill type elastoplastic solids

S. HAZANOV and C. HUET 1995 Order relationships for boundary conditions effect in heterogeneous bodies smaller than the representative volume
